

PanoVue™

INTERACTIVE PANORAMIC THEATER

exhibitry.com

PanoVue™

PanoVue is a portable and practical immersive projection theater. The 210 x 75 degree field of view makes panoramic video and animation a perfect environment for engaging trade show presentation, flight, driving, and training simulations.

Designed to fit in spaces with a 9' ceiling, PanoVue is the best screen option for immersive projection in a standard-sized room.

The standard 4m PanoVue immerses 3-15 people; it's scalable to any size with both portable and permanent options. The images to the right show PanoVue presented in a tradeshow environment with a custom enclosure. The sketch below demonstrates the footprint in a 20' x 20' booth.

Every PanoVue project is customized to your marketing and presentation needs. Learn more at:

exhibitry.com

Use PanoVue for

- product demonstration
- interactive kiosks
- web presentations
- product simulations
- interactive presentation
- live presentations

We are exhibitry.com

Your product has a story to tell. We make multimedia experiences that tell those stories. From concept to completion, the artists, directors, animators and trade show technologists of exhibitry.com create communicative media that informs and motivates customers. We specialize in:

- Interactive kiosks and models
- Projection mapping
- Trade show apps
- Animation
- Custom fabrication

Our products and services have proven effective for marketing and communication at trade shows, client events and marketing venues around the world. For more information, visit our website, or give us a call:
