

VRVue™

REAL-WORLD VIRTUAL REALITY

exhibitry.com

VR Vue™

VR Vue adds a new dimension to virtual reality. Now you can see, touch and feel the virtual world. VR Vue syncs real-world objects with their digital counterparts to create a truly immersive environment perfect for demonstrating products, explaining concepts and educating customers.

Simple physical objects, referred to as VR Vue Sculptures, come to life with activity highlighting features and benefits. Products, equipment and environments become interactive at the wave of a hand or the touch a finger. Customers can examine, explore and even operate products and machinery in the VR Vue augmented virtual world.

VR Vue is an end-to-end solution that features a customized virtual reality experience, VR Vue Sculptures and our line of real-world virtual reality systems.

exhibitry.com/VRVue

A customer stands before a VR Vue Sculpture – a simple tube on a stand. In VR Vue however she sees a complex animated product. (above) She can inspect details, examine an x-ray view and even interactively operate the product.

Experience VR Vue

Need to demonstrate your product? Create a hands-on experience for customers? Explore a virtual world? Exhibitry.com creates compelling **VR Vue Experiences** (left) customized to your presentation needs.

VR Vue Station (far right) is a self-contained interactive system that includes the unique VR Vue Headset, wireless controllers, CPU and an interactive instructional screen. The station is perfect for use at trade shows, for conference rooms and in corporate presentation theaters. True road warriors should consider **VR Vue Portable** (back page.)

For an inclusive collaborative experience, the **VR Vue-r** (right) creates an interactive window to your virtual world. Users can tilt, pan, interact and even move the screen anywhere in the room to participate in the virtual experience without the need for a headset.

Our custom headsets leverage real-world objects and concepts to make virtual reality simple and comfortable for every user. **VR Vue Hardhat** slips on and off with ease and is far less intimidating than traditional VR headgear.

Use VR Vue Experiences for

- corporate theater
- product demonstration
- product simulations
- interactive presentation
- live presentations

Your product has a story to tell.

We make multimedia experiences that tell those stories. From concept to completion, the artists, directors, animators and trade show technologists of exhibitry.com create communicative media that informs and motivates customers. We specialize in:

- Interactive kiosks and models
- Virtual reality
- Projection mapping
- Trade show apps
- Animation

Our products and services have proven effective for marketing and communication at trade shows, client events and marketing venues around the world. For more information, visit our website, or give us a call:
