# LumaKiosk™

It's time to lighten up. The new LumaKiosk from Exhibitry.com grabs customer's attention with its colorful glow, LED-lit acrylic header and, of course, your video or interactive presentation.

LumaKiosk is designed for portability and practicality. It sets up (and even more important, tears down) in minutes. The kiosk, electronics, monitor stand and signage all pack flat into a single rolling case that can be checked as standard luggage.

Created with the trade show road warrior in mind, LumaKiosk features unprecedented flexibility in form, function and purchase options. Exhibitry.com offers a variety of cost-effective packages. Whether you need just a BYOTV (Bring Your Own TV) stand-alone kiosk, or you opt for a full interactive package that includes our affordable 55" touch monitor, custom signage, media player, rolling travel case and interactive content production.

LumaKiosk is an exhibitry.com exclusive. Learn more at:

Use LumaKiosk for:

- interactive kiosks
- product demonstration
- digital signage
- trade show booth schedules
- marketing videos
- web presentations
- interactive presentation

## Portrait or Landscape?

It's your choice. LumaKiosk easily adapts to fit your content; from a traditional HD horizontal display to a vertical portrait mode for specially-formatted content.

Either choice creates a unique look for trade show booths, public information kiosks and digital signage.

## You choose the hue.

Present your message big and bold or cool and subtle. You decide. LumaKiosk features interactive LED lighting that you control .

Pick a hue, saturation and brightness to fit your corporate color scheme, your presentation's color pallet or just the mood you woke up in that morning.

## We are exhibitry.com

Your product has a story to tell. We make multimedia experiences that tell those stories. From concept to completion, the artists, directors, animators and trade show technologists of exhibitry.com create communicative media that informs and motivates customers. We specialize in:

- Interactive kiosks and models
- Projection mapping
- Trade show apps
- Animation
- Custom fabrication

Our products and services have proven effective for marketing and communication at trade shows, client events and marketing venues around the world. For more information, visit our website, or give us a call:
