Aluvision

EXHIBITS & EVENTS

Our mission is imagineering. We inspire & connect partners on their creative journey to design & build modular environments.

Λluvision
EXHIBITS & EVENTS

Why choose Aluvision?

- ☑ **Plug-and-play** modular system, toolless assembly

- ☑ **Endless possibilities using panel, fabric and LED**, freedom of configuration and seamless integration

- ☑ **Highest precision & quality standards** in aluminum frame and LED tile production

- ☑ **Engineered to last,** 100% reusable and 100% recyclable

- ☑ **Hi-LED 55 offers a full range of possibilities:** flat, curved R1.4' and R5', angle (IF award 2020)

- ☑ **Short production** lead times

- ☑ **Customer support,** proactive approach

- ☑ **R&D,** the beating heart of Aluvision

- ☑ **Worldwide network,** a focus on long-term partnerships

- ☑ **360° solution:** walls, floor & ceiling

Decades of experience in making customer projects unique. Let's imagineer.

Make the difference

As innovative developer & worldwide supplier of high quality modular systems for indoor & outdoor environments, Aluvision combines bold imagination with unmatched engineering and manufacturing expertise. The Aluvision frame system offers solutions for straight and curved walls, LED videowalls, hanging signs, light walls, displays & retail environments. Sustainability, reusability, precision, flexibility and modularity are the core features.

Aluvision is a first-generation manufacturing company where passion and drive are core elements. A family business started by a strong couple, Ann Vancoillie and Dirk Deleu. Aluvision tells a story of ambition, challenge and growth. We dare to dream, but at the same time we like a 'no-nonsense' approach.

Founded in Belgium in 2003, Aluvision currently employs over 120 people and services more than 3,000 partners worldwide. The company has large production facilities and inspiring showrooms in Deinze (BE) and Atlanta (USA).

Original manufacturer of the Aluvision system.

Your partner in modular exhibit solutions

EFFICIENCY

We continuously strive for maximal output with minimal effort. Our frame systems are easy to build (no tools needed!) and guarantee a high return on investment.

INNOVATION

With research and development at the core of our company, we aim to build intelligent products with a lean design, while continuously looking for new technologies.

QUALITY

From production to customer service — we always strive for high-end quality. A keen eye for detail and internal quality checks ensure we deliver on our promises.

MODULARITY

Our modular design offers endless combinations and creative possibilities with a wide range of materials and reusable products.

SUSTAINABILITY

We limit our environmental impact by producing reusable and recyclable lightweight products with a long lifespan. Moreover, our production plant mainly runs on solar energy and we sustain our own waste-management program.

Let's imagineer

Keep
it simple

Smart design is driven by simplicity. The strength of our toolless frame system lays in its intuitive and fast installation. Plug & play!

Be
a trendsetter

In the fast-moving world of trade shows and exhibitions, new product design is the key to continuous growth. Being the leading system supplier in the event industry, Aluvision always stays one step ahead.
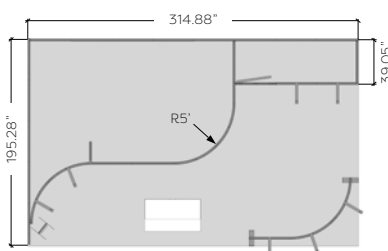

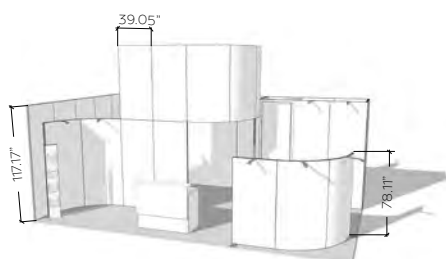

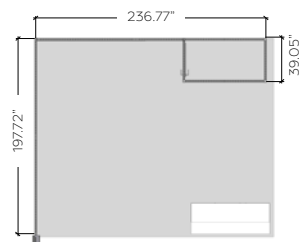

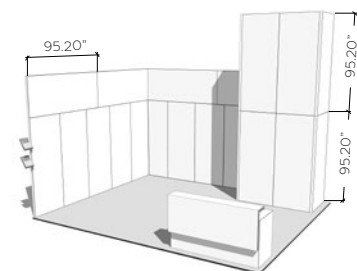

Invest
in the future

In order to ensure company growth, continuous investments are required. Aluvision focuses on the future by using the latest production technologies and by stimulating talent and team spirit.

Think
global

In the exhibit & event industry, globalization is evident. Aluvision shares this spirit by having a worldwide support and distribution network, with production facilities both in Europe and the USA and experienced rental partners.

Get inspired

The concept gallery is the fastest way to find ready-made booth designs. Discover our concept gallery online! The filter function will help you select the type of booth you're looking for. It will also show you the numerous possibilities Aluvision has to offer. However, do not let this gallery restrict your ideas. Tease your imagination and you will be amazed.
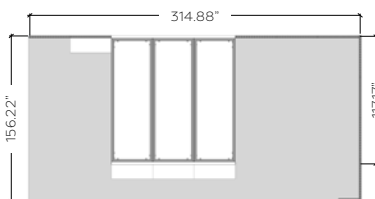

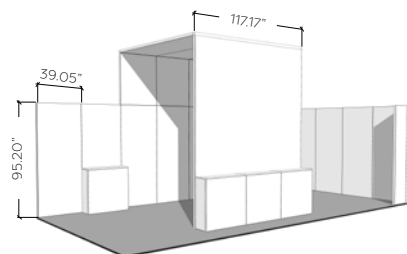

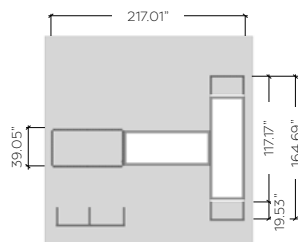

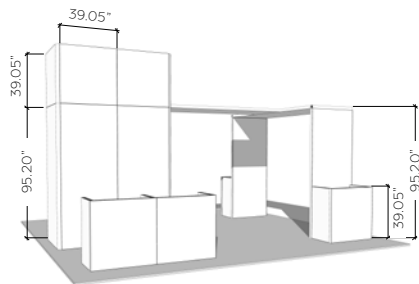

Set yourself up for success with one of our multifunctional starter kits

This simple purchase will lead to an optimal return on investment (ROI). A perfect start for a long-term collaboration. Combinations are endless: you can keep re-using and re-configuring the same frames or further expand by adding new frames and parts. Discover them online!

www.aluvision.com

Combine panel and fabric in one system

The best of both worlds. Continue building with standard, easy to handle frame sizes, and have one large SEG (Silicone Edge Graphic) seamlessly run over several frames. If needed, a rigid panel can be placed behind the fabric (e.g. for doors) or the use of fabrics and panels can be alternated. The most efficient concept in terms of reusability and flexibility of wall and ceiling frames. Most frames are available with an anodized or black powder coated finish standard, but other RAL colors are also available upon request.

Solid integration of glass walls and doors

The Basic-55 glass profile is the most elegant solution for the integration of glass or acrylic walls and doors into your design. The frames ensure an elegant application of clear infills such as glass or acrylic with a narrow edge to stay visually appealing. These frames are compatible with all 2.17" (55 mm) frame systems, and are standard available in an anodized finish or with a black powder coating.

Seamless fabric walls for large graphics

This range of solutions is used for straight walls and in specific cases also for curved walls. The frames can be rectangular or have curved corners allowing for maximum design possibilities. Profiles are available in different depths to allow for an optimal solution in every situation. Frames can be easily disassembled allowing you to reduce transport volume. Aluvision will be happy to advise you on which system to use in which situation.

LED light box solutions

Illuminate your large format graphics and boost your commercial message. Using perimeter lighting or backlighting technology, the packaging volume has been reduced to a minimum. Installation takes nothing more than assembling four aluminum profiles into a lightweight, yet rigid frame and attaching a SEG (Silicone Edge Graphic), without requiring any tools. The high quality LEDs ensure an intense and uniform illumination for light walls up to 16' (5 m) wide.

Suspended 3D structures

Hanging signs attract the attention from far away. It is all about standing out from the crowd! Aluvision has a range of solutions with or without backlighting and using rigid or fabric infills. All systems are very user friendly and easy to build. You can use the quickfix corner connectors or the very handy 3D corner pieces with a slide & fix system. We will be happy to advise what system to choose in your specific situation.

We take you to a higher level

The Step floor is easy to install and adjustable in height. The system combines pre-assembled frames with corner and edge modules. The standard grid is 39.37" by 39.37" but thanks to a supporting surface to either side of the T-shaped Step profile, you only need half of the amount of floor frames that you would expect.

Why choose Hi-LED 55?

- ☑ Straight & curved LED tiles for walls, ceilings and floors

- ☑ Advanced all-in-one design

- ☑ Quick, easy and toolless installation

- ☑ Full front & rear maintenance (both LED modules and power box)

- ☑ Raised flooring system

- ☑ One tile, endless solutions: Hi-LED 55+

- ☑ Endless possibilities for assembly, including concave & convex mounting

- ☑ Specially developed flight cases for secure transportation

Seamless modular LED video walls

Boost your tradeshow presence by integrating in the Hi-LED 55 range into any setup you can think of. Choose wall, display, ceiling, floor or hanging constructions to bring your creative ideas to life. Be ahead of the curve with our new Hi-LED 55 convex and concave tiles. Available in three radii, these curved tiles can give your design a new twist.

Transform the most versatile LED tile into 5 different configurations

1 Straight tile

This is where it all begins. A convertible LED tile, fully compatible with the Aluvision frame system and Hi-LED 55.

2 Corner

Let's get the magic started & convert two tiles into a seamless 90° corner.

3 3D corner

Let's add a little extra, and create a 3D corner. Don't forget, all of this with just one building block.

4 Cube

Let's go all the way and create a cube. This tile is able to seamlessly finish up to 6 sides. Combine more Hi-LED 55+ tiles to create different sizes.

5 Concave & convex

Let's create an edge. Think waves, curved walls, or basically any curved construction. Just go wild!

The world is at your feet

From a dynamic floor at trade shows, to an eye-catcher at your corporate event, anything is possible with this raised LED flooring system. This floor is built out of a solid aluminum subflooring and tempered glass to protect the LED units. Thanks to the adjustable foot, you can level the floor between 4.72" and 5.71".
