# LOVO™ SLIM 12-IN-1 LED RECESSED LIGHT

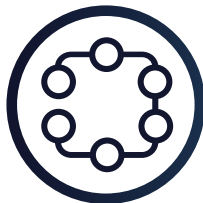

Lovo™ Slim 12-in-1 is the first LED recessed light that gives you the ability to customize on the spot! At 10 Watts and 800 lumen output, each LovoSlim fixture allows you to choose between 3 color temperatures, change the fixture finish color instantly with magnetically attached trim rings, and is fully dimmable! With Prism designed low voltage FC cable system, you can daisy chain up to 6 fixtures in a row and if more lights are needed, simply add multipoint connectors to link all the lights to a single power supply.
